

Break the Status Quo Vote for YOUR Future

We Are Killing Our Planet

We clear-cut it, drill it, bomb it, bleed it and poison it. Ice sheets are crumbling. Massive methane deposits are thawing and threatening to push us over the edge. Extreme heat waves, droughts, wild fires, floods, crop failures and species extinction are becoming common.

What prevents Saving Our Planet is the same as what causes Our Other Problems

Corporate greed and its stranglehold on our political/economic system is what keeps us an imperialist superpower, dominating the rest of the world and exploiting its resources, all to keep the cancerous 'GROWTH' of capital. It's why we spend trillions of \$\$\$ on war while making our country less safe and poorer at home.

Corporate Greed is why millions are jobless or under-paid, why millions lose their homes, why even more are without healthcare, why schools have to close, and more prisons are built to lock up even more poor Americans.

Corporate greed is why when "climate" or "energy" legislation is on the table, they only provide false solutions.

Without breaking the money-ruled political/economic system that
BOTH MAJOR PARTIES ARE SERVANTS TO,
all our social injustices will only worsen, our very survival become questionable.

All Green Party Candidates Refuse Corporate Money
